Synthetic Test: Multi-Level Numbering

Level 3 uses lvlRestart=1, so it should restart only after a level-1 item. Expected labels are listed in the case explanation (compatibility-tests/docx/DOCX-NUMBERING-0001).

1. Section A
    1.1. Sub-section A.1
        1.1.1. Detail one
        1.1.2. Detail two
    1.2. Sub-section A.2
        1.2.1. Detail three
        1.2.2. Detail four
2. Section B
    2.1. Sub-section B.1
        2.1.1. Detail five

A second list instance with a startOverride of 5 on level 1:

5. Override item
    5.1. Override sub-item

Nested table (a table inside a table cell):

<table>
<tr><td>Outer cell 1<table><tr><td>Inner cell 1</td><td>Inner cell 2</td></tr></table>After inner table</td><td>Outer cell 2
Outer cell 4</td></tr>
</table>

Legacy VML shape (rectangle) follows:
